Anti electric shock protection/arc detection/short circuit protection

The AT9620 AC/DC withstand voltage insulation tester is an instrument that integrates multiple testing functions such as electrical strength (AC/DC withstand voltage) and insulation resistance. It is an important testing equipment for various electrical manufacturers and quality inspection departments.

Power Supply 220VAC 50Hz~60Hz Power: maximum 550VA

The AT9620 uses a high-speed microprocessor as the control core and can measure various safety and regulatory parameters of the tested object in real-time. It can complete three tests within 4 seconds, especially meeting the requirements of production lines for fast testing.
